Professional Summary

Motivated and detail-oriented Software Engineering undergraduate at the University of Peshawar with a good foundation in modern web technologies and core software engineering principles. Experienced in building responsive, user-friendly, and full-stack applications using the MERN stack (MongoDB, Express.js, React.js, Node.js) and SQL. Passionate about solving real-world problems through clean code, structured data architectures, and continuous self-learning.

Education

University of Peshawar Bachelor of Science in Software Engineering Cumulative CGPA: 3.66/4.00	Peshawar, Pakistan 2024 – 2028
Islamia College Peshawar FSc (Pre-Engineering)	Peshawar, Pakistan 2021 – 2023

Technical Skills

Programming Languages: JavaScript, C++, SQL

Frontend Development: HTML5, CSS3, JavaScript (ES6+), React.js, Responsive UI Design

Backend Development: Node.js, Express.js, RESTful APIs

Databases: MongoDB, MySQL

Tools & Technologies: Git, GitHub, VS Code, Photoshop, Vercel

Core Concepts: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP)

Projects

Expense Tracker Application *JavaScript, HTML5, CSS3*

- Engineered a dynamic financial tracking web application featuring real-time income and expense management.
- Implemented dynamic state updates for balance calculations and leveraged browser LocalStorage for reliable data persistence.

React Portfolio Website *Html5, CSS3, Javascript, Vercel*

- Architected a modern personal portfolio utilizing a clean, scalable component-based structure in React.
- Designed fluid layouts optimized for mobile, tablet, and desktop viewports to showcase personal engineering milestones.

Full-Featured Gym Website *React.js , Javascript*

- Developed a fully responsive fitness web platform implementing modular semantic layouts and clean navigation flows.
- Optimized frontend asset rendering speeds to improve performance scores and enhance user retention rates.

Interactive Todo Application *React.js, JavaScript*

- Built a seamless task scheduling system deploying core CRUD functionalities and localized state lifecycle methods.
- Improved task organization workflows by delivering instantaneous client-side updates without full-page reloads.

Relevant Coursework

Data Structures and Algorithms • Object-Oriented Programming • Database Systems • Software Engineering • Web Engineering • Computer Networks

Languages & Interests

Languages: English (Professional), Urdu (Fluent), Pashto (Native)

Interests: Full-Stack Web Development, Open Source Contribution, Cloud Computing, Technical Problem Solving
